Welcome to Geeks At Home & Work!

BUSINESS SERVICES

RESIDENTIAL SERVICES

Has your computer slowed to a snail's pace? Does it freeze or give you the "blue screen of death?" Then you need the help of Geeks At Home & Work! We are troubleshooting professionals ready to save the day!

Slow computers can not only be frustrating, but they can halt your work day, or worse – prevent any work from happening at all! Viruses, "spam" e-mails and spy-ware are all out there and ready to strike your pc at any time while you're online. We can help tune up and optimize your machine, as well as prevent future problems from arising.

Data loss can also ruin your day. We can help recover information from most hard drives and systems losses, and create backup systems that will prevent future failures from wiping out your information.

Software and hardware updates, installations and support, including printer, driver, and network installations, are available as well. We will come to your home or office, or you can drop off ailing computers and parts for repair.

Call us and let us know what's keeping you from having a good day with your computer!
